

INA

# DIASCA

Digital Integration of Agricultural  
Supply Chains Alliance

**1<sup>st</sup> Round Table Meeting**

7 Sept 2022, 3-6 pm CEST

Time (CEST/EDT)		Topic	Presenter / Host
15:00	09:00	Official Opening	Leonhard Nima (Moderator)
		Welcome by BMZ	Sebastian Lesch (BMZ)
		DIASCA Introduction	Lars Kahnert (INA/GIZ)
15:20	09:20	Speed Dating	Leonhard Nima
15:30	09:30	Topics, Work Plan and Roadmap	Tim Bartram (GS1)
		Introduction to: Traceability, Farm Income/Entity Level Sustainability & Forest Monitoring/Geospatial Data	Niklas Kuhnert (GS1) Daniele Giovannucci (COSA)
15:55	09:55	Results from Survey and Subgroups on Topics getting started	Julian Majert (GS1)
16:05	10:05	Parallel Break-Out Sessions: (1) Traceability, (2) Farm Income and (3) Forest Monitoring	Niklas Kuhnert (GS1), Daniele Giovannucci, Liam Brody & Chris Chowdhury (COSA)
17:40	11:40	Presentation of Break-Out Results	Break-Out Hosts
17:55	11:55	Next Steps and Goodbye	Lars Kahnert (INA/GIZ)
18:00	12:00	Closing	

# Why interoperability? DIASCA and its objectives

Lars Kahnert

Initiative for Sustainable Agricultural Supply Chains (INA)

# The Initiative for Sustainable Agricultural Supply Chains (INA)

- A **platform of actors from the private sector, civil society and government** with the goal to increase sustainability in global supply chains and to improve the living conditions of smallholder farmers.
- INA hosts **commodity-specific multi-actor partnerships** (e.g., GISCO for cocoa, PANAQ for orange juice, FONAP for palm oil).

## INA key topics

Deforestation-free  
Supply Chains

Digitalisation

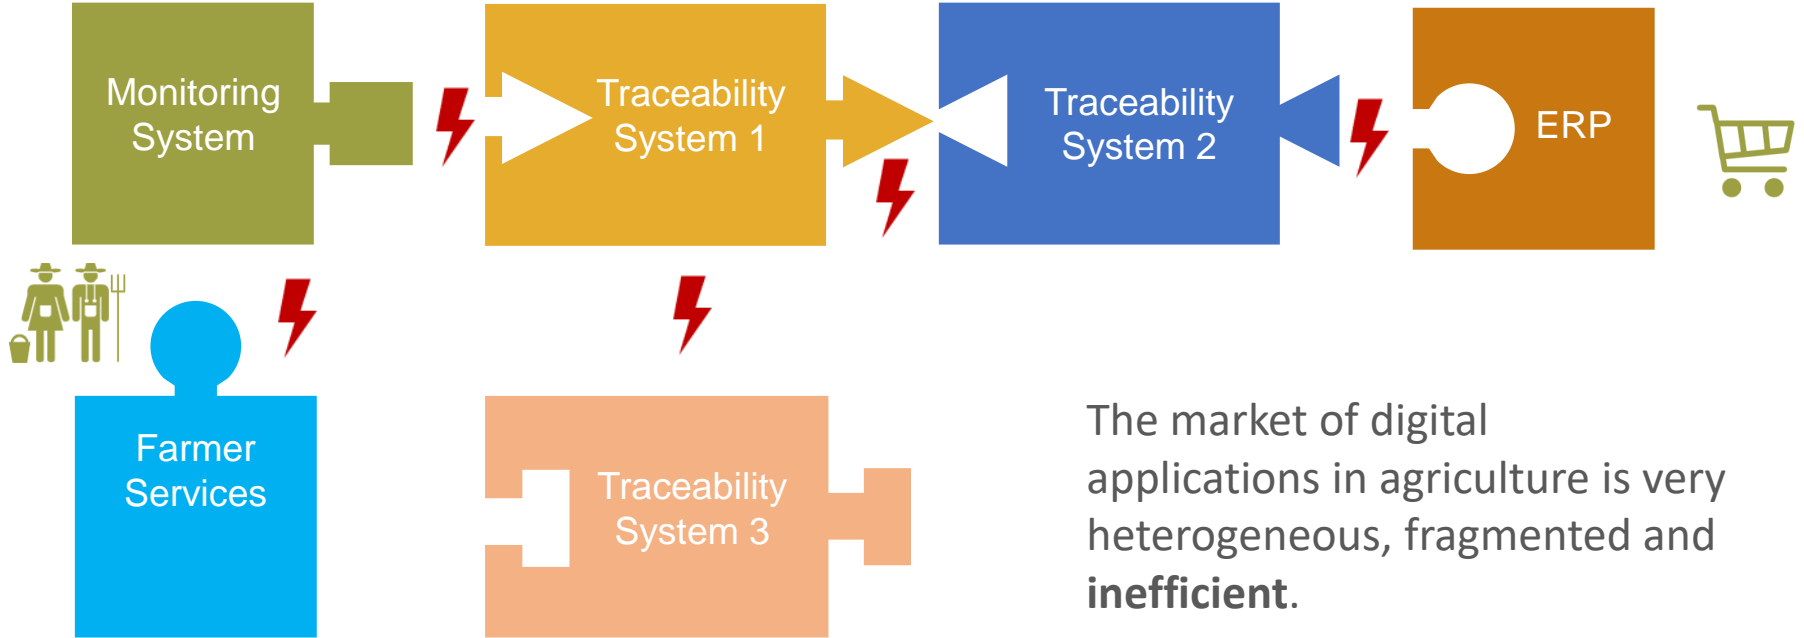

Living Income

Sustainability  
Standards

# INA The Digital Patchwork

The market of digital applications in agriculture is very heterogeneous, fragmented and **inefficient**.

What do they do with my data?

I thought, digitalization makes life easier...

I have to work with three different traceability systems, which means much more administrative burden!

Traceability systems are **not compatible**.

Multiple data production means **increased effort and cost**.

Data is **hardly available to farmers**, despite its economic value for analysis and re-use.

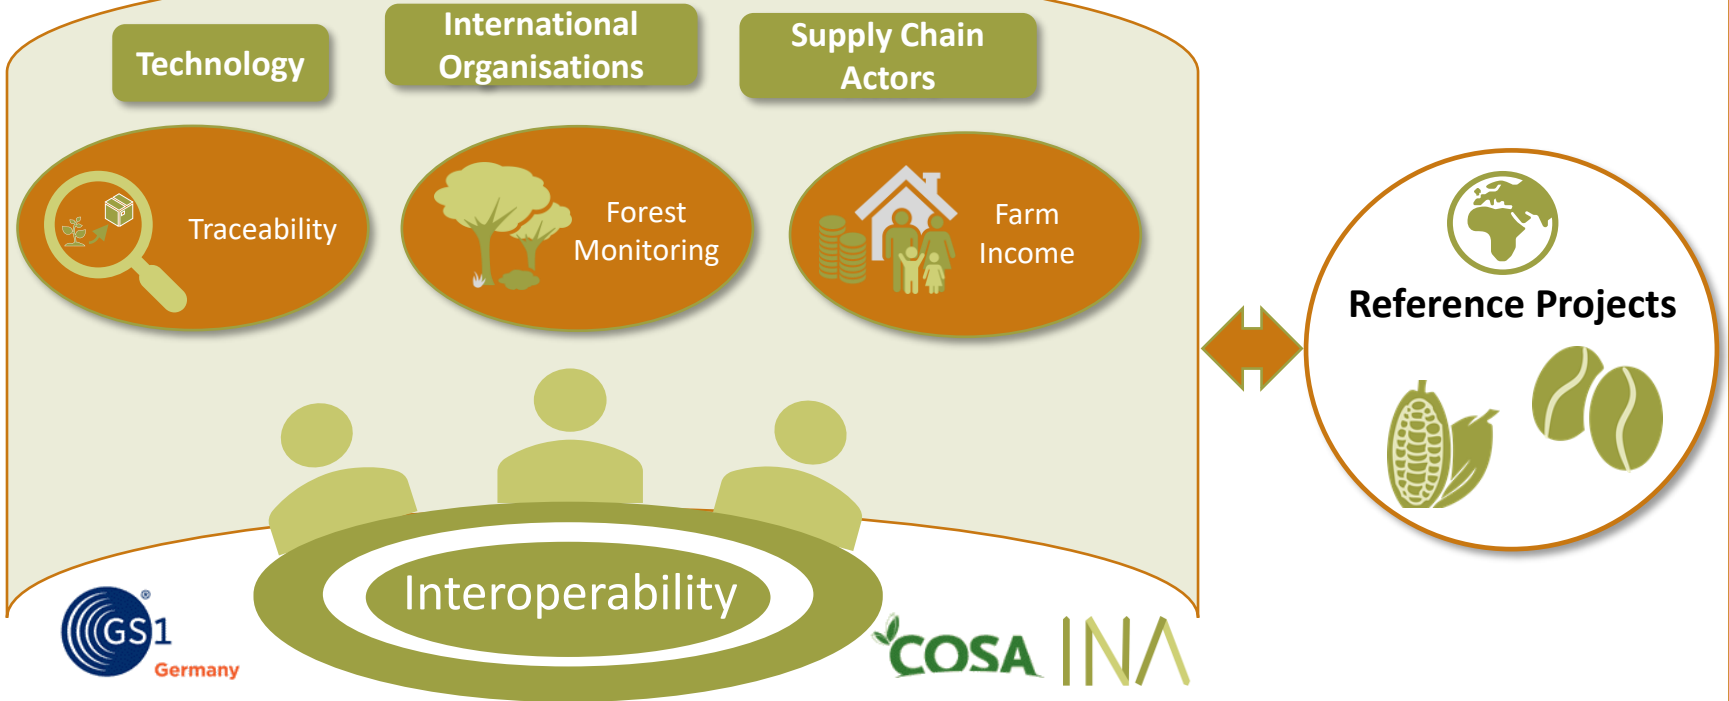

I need to manage tons of incompatible data of dubious quality

Which technology solution should I use?

How can I prove that my products are deforestation-free?

# Setup: Roundtable, Working Groups, Reference Projects

Facilitation Agreement on Standard(ization)

Expertise Advice Acceptance

Implementation Reality Check

Data standards are technical specifications of how to exchange data

# INA Vision

We need an efficient "ecosystem" of digital applications with improved participation and data sovereignty for producers

# INA Interoperable Digital Ecosystem Benefits

- Less data production effort
- No vendor lock-in
- Increased data sovereignty
- Product value-added through standardized digital twin
- Better access to markets

- Integrateability with adjacent or complementary systems
- More attractive value proposition

- Efficient national digital (ag) ecosystem
- Transferrable trade and ESG data

- Significantly lower cost of due diligence, compliance & supply chain management
- Higher digital flexibility
- Easier onboarding of new suppliers
- Easier compliance through defined data structure & quality
